## Water Quality Improvements at Adult and Juvenile Justice Centers

This project aims to improve water quality at both the Adult Justice Center and Juvenile Justice Center, by removing outdated treatment systems (photos above left) and installing modern filtration and softening systems (photos above right). The new treatment systems will ensure reliable and safe water access for all facility occupants and will allow for water testing access points to monitor quality over time.

## Donated Artwork Adorns Public Entrance in Geneva

The public entrance to Building A at the Government Center Campus in Geneva was brought to life thanks to a generous donation from Geneva resident, Charles Cassell. Visitors can now view seven of his original watercolor paintings that adorn the walls. Thanks to Painter Joulian Beletski for installing the artwork!
