Dear Natalie Zine,

I live at 734 Canyon Lane, Elgin 60123. This is about 1 mile from the proposed solar farm. I want to register my no vote on the proposed solar farm.

I'm not against solar per se, but a better place for a solar farm is out in the country where it isn't an eyesore. The proposed location for this solar farm is visible to thousands of people every day including me. It would be such an ugly industrial-looking use of that land. Certainly, aesthetics matter when zoning decisions are made. This proposed location is too close to well established residential neighborhoods and business/professional offices. It would be in conflict with the existing land uses in that area. Again, it would be an industrial eyesore.

Thank you,  
Michael Hurd
