Sugar Grove Township, Kane County, Illinois 60506

Terracon Project No. 11257111

Dear Mr. LaNoce:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Proposal No. P11257111 dated May 6, 2025.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at <a href="https://www.terracon.com">www.terracon.com</a>. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

**Terracon Consultants, Inc.**

APPENDIX E Credentials

## **Executive Summary**

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. P11257111 dated May 6, 2025, and was conducted consistent with the procedures included in ASTM E2247-23, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property. The ESA was conducted under the supervision or responsible charge of Rachelle K. Christian, Environmental Professional. Amy K. Worley-Peterson performed the site reconnaissance on May 22, 2025.

### **Findings and Opinions**

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

### Site Description and Use

According to the Kane County Tax Assessor, site observations, and information provided by the Client, the site consists of approximately 138.09 acres made up of Kane County parcels 14-23-300-018, 14-26-300-003, and 14-26-100-004. The site is located along the south side of Prairie Street in Sugar Grove Township, Illinois. The site consists of primarily agricultural land cropped with corn and/or soybeans. The site has a barn/residence, a larger barn, and six grain bins in the northeast portion of the site. An access road extends south from Prairie Street near the structures. The site has two ponds further to the south; the northern/larger pond also has a gazebo. Please refer to Exhibit 2 in Appendix A for a diagram of the site.

#### Historical Information

The majority of the site has been vacant or agricultural land from at least 1925 through present-day. Bodies of water, depressions indicating low-lying wet areas, and/or mapped wetlands have been present on the southern part of the site since at least 1925. Structures were present in the northeast portion of the site starting in approximately 1932. The north-south trending access road first appears in approximately 1939. By 1952 the aerials are clear enough to see the structures in the northeast portion of the site and consist of a barn and multiple sheds. Five grain bins appear on the northeast part of the site starting in 1963; the sixth appears in approximately 1983. The configuration of the present-day structures on the northeastern farmstead and the ponds to the south were present by 1993. Surrounding properties have been agricultural and/or residential from 1939 through present day, with a northwest-southeast trending road along the north site boundary.

Phase I Environmental Site Assessment Bluestem Solar | Sugar Grove Township, Illinois June 5, 2025 | Terracon Project No. 11257111

#### Records Review

Selected federal and state databases as well as responses from the state and local regulatory agencies were reviewed. The EDR regulatory database report did not identify any listings for the site or adjoining properties; therefore, no recognized environmental conditions (RECs) were identified. The site and adjoining properties were not identified with a PFAS ECHO listing in the EDR database report.

#### Site Reconnaissance

The site was being utilized as farmland/vacant land at the time of the site reconnaissance. The site also has a barn/residence, larger garage, and six grain bins located in the northeastern portion of the site, along Prairie Street. The site has two ponds located in the southern portion of the site. The northern/larger pond also has a gazebo north of the pond. Due to the large size and rural/forested nature of the site, Terracon reviewed aerial photographs and topographic maps to evaluate areas of environmental interest (AOIs). Areas of environmental interest are defined as, "an area or areas of the property with indications of activity that could have resulted in the presence of a recognized environmental condition, especially areas where hazardous substances or petroleum products may be used, handled, managed or stored or may have been used, handled, managed or stored in the past." Three AOIs were identified: the area of existing farm structures, the area surrounding the northern/larger pond in the southern central portion of the site, and the area of the southernmost/smaller pond. No RECs were identified during the site reconnaissance.

#### Adjoining Properties

The site is bordered by the following: Prairie Street followed by row-crop agriculture to the north, and row-crop agriculture to the east, south, and west.

### **Significant Data Gaps**

Significant data gaps (SDGs) were not identified.

#### Additional Services

During the cultural resources review, Terracon did not identify any listed, determined eligible, or previously recorded sites or properties within the site. Fourteen unlisted and non-eligible previously identified resources were identified within a one-mile buffer of the site. The site is located within a high probability area for archaeological sites according to the Illinois Archaeological Predictive Model, as such, it is recommended that if there is a public or private project in the future within the proposed site subject to federal or state laws, additional historic and cultural resources investigations and consultation with the SHPO will be needed.

Phase I Environmental Site Assessment Bluestem Solar | Sugar Grove Township, Illinois June 5, 2025 | Terracon Project No. 11257111

During the field investigation, Terracon identified 1 drainage ditch, 3 drain pipes, a culvert along the northern site boundary, 2 potential wells, 2 potential wetland areas, electrical power transmission lines, and 2 aquatic features (ponds) in the study area. Gas pipeline markers or unregistered cemeteries were not observed during the site reconnaissance.

#### **Conclusions**

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 2247-23 south of Prairie Street, Sugar Grove Township, Kane County, Illinois, the site. RECs, Controlled RECs (CRECs), and/or SDGs were not identified in connection with the site.

### **Recommendations**

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs, CRECs, or SDGs in connection with the site. As such, no additional investigation is warranted at this time.

### 1.0 Introduction

### 1.1 Site Description

Site Name	Bluestem Solar
Site Location/Address	South side of Prairie Street, Sugar Grove Township, Kane County, Illinois
Parcel Number	14-23-300-018, 14-26-300-003, 14-26-100-004
Land Area	Approximately 138.09 acres
Site Improvements	None except for the following improvements on Kane County parcels:  14-23-300-018: 1 barn/residence (street address of 40W489 Prairie Street), 1 barn, 6 grain bins 14-26-300-003 and 14-26-100-004: 1 gazebo, 2 ponds
Anticipated Future Site Use	Site will host three 5 MWac / 7 MWdc community solar projects
Purpose of the ESA	Financing

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A.

### 1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. P11257111 dated May 6, 2025, and was conducted consistent with the procedures included in ASTM E2247-23, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive

reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E2247-23 includes the definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E2247-23, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

Review of Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS)

PFAS are a family of compounds which are considered emerging contaminants of concern due to their mobility and longevity in the environment. PFAS has been used in many products, including but not limited to fire-fighting foam, anti-stick coatings, stain and water-repellent coatings, electroplating, and paper products, among others. On July 8, 2024, US EPA designated two PFAS compounds, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), including their salts and structural isomers, as hazardous substances under CERCLA; accordingly, PFOA and PFOS was evaluated within the scope of E1527-21. Please note that PFAS compounds are ubiquitous in the environment and this limited review is not to be construed as confirmation that PFAS compounds are not present in, at or under the site.

Additional Services

As requested by the client, the following additional services were performed:

- Historic Properties/Archaeological Resources Review
- Windshield Survey

#### 1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of

information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

### 1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

At the direction of the client, Terracon did not view the interiors of the structures.
 Terracon assumes the client is evaluating this item separately.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance

and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

#### 1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Clean Field Power LLC. Use or reliance by any other party is prohibited without the written authorization of Clean Field Power LLC and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E2247-23 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E2247-23.

#### 1.6 Client Provided Information

Prior to the site visit, Gary LaNoce, client's representative, was asked to provide the following user questionnaire information as described in ASTM E2247-23 Section 6.

### **Client Questionnaire Responses**

Client Questionnaire Item	Client Did Not	Client's Response	
Respond		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X

Client Questionnaire Item	Client Did Not Respond	Client's Response	
	Respond	Yes	No
Obvious Indicators of Contamination at the site.			X

Terracon's consideration of the client-provided information did not identify RECs. A copy of the questionnaire is included in Appendix C.

## 2.0 Physical Setting

Physical Setting Information		Source		
Topography				
Site Elevation	Approximately 715 feet above sea level			
Topographic Gradient	Generally flat, sloping towards the south.	USGS Topographic Map, Kane County, Illinois Appendix A		
Closest Surface Water	On-site ponds near the center of the site and potential wetland in the southwest corner of the site.			
	Soil Characteristics			
Soil Type	Danabrook silt loam, La Rose loam			
Description	The site is made up of hydric soils with no flooding frequency, and most of the site is classified as prime farmland, farmland of statewide importance, or prime farmland if drained.	USDA NRCS gSSURGO data, published 10-23-2024		
Geology/Hydrogeology				
Formation	Silurian System undivided	USGS, published 08-01-2017		

Physical Setting Information		Source	
Description	Major lithologies include Dolostone and Limestone. Minor lithology comprised of Shale.		
Estimated Depth to First Occurrence of Groundwater	Approximately 1-3 feet below ground surface (bgs).	USDA NRCS gSSURGO data, published 10-23-2024	
*Hydrogeologic Gradient	Not known - may be inferred to be gradient (primarily to the south).		

<sup>\*</sup> The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 3.0 Historical Use Information

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

### 3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps and selected historical aerial photographs (at approximately 10 to 15 year intervals) were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- <u>Topographic map</u>: Yorkville, Illinois, **1925**; and **1954** photo revised in 1952 (1:62,500)
- Topographic map: Yorkville, Illinois, 1953 photo revised in 1952; 1973 photo revised in 1973; 2012; 2015; 2018; and 2021 (1:24,000)

- <u>Topographic map</u>: Geneva, Illinois, **1932**; and **1948** (1: 62,500)
- Topographic map: Sugar Grove, Illinois, 1964 photo revised in 1963;
   1972 photo revised in 1972; 1978 photo revised in 1972; 2012; 2015;
   2018; and 2021 (1:24,000)
- Aerial photographs: 1939; 1952; 1954; 1963; 1973; 1978; 1983; 1988; 1993; 1998; 2006; 2009; 2012; 2015; and 2019 (1"=750")

### **Historical Maps and Aerial Photographs**

Direction	Description
Site	Northern part of the site is unmapped, a body of water crosses the southwest corner of the site trending northwest to southeast, and the remainder of the mapped site appears vacant (1925); southern part of the site is unmapped, a structure is present in the northeast corner of the site, and the remainder of the mapped site appears vacant (1932); structure in the northeast corner of the site has a driveway from the north adjoining road which connects to the north-south trending access road through the middle of the site (1939); southern part of the site is unmapped (1948); a driveway from north adjoining road leads to a structure and sheds in the northeast corner of the site, the north-south trending access road doesn't appear to connect to the driveway, and an apparent depression is present in the northwest corner of the site (1952); northern portion of the site is unmapped and the remainder of the site appears vacant (1953); vegetation may be obscuring sheds near the structure in the northeast and the driveway from north adjoining road again appears to connect to the north-south trending access road (1954); addition of five grain bins in the northeast, drainage ditch in the central-west portion of the site, and some depressions in the south (1963); southern portion of the site is unmapped, structures in the northeast (1964); vegetation north of the drainage ditch, depression in the northwest, and depressions in the south (1972-1978); additional grain bin appears (1983); structures and grain bins in northeast resemble present day configuration, driveway and access road are more defined, a pond with vegetation to the north and an access road are more defined, a pond with vegetation to the north and an access road connected to the main access road replaced the west-central vegetation, and another pond is present to the south, west of the main access road, after which the access road ends (1993); access road extends further to the south of the southernmost pond (2015); potential wetlands mapped in the southwest co

Direction	Description
North	Unmapped (1925); road trending northwest-southeast followed by vacant land (1932); road trending northwest-southeast followed by agricultural/vacant land (1939-1948); depression appears (1952); unmapped (1953); northwest-southeast trending road followed by agricultural land (1954-2021).
East	Unmapped to the north and vacant land to the south (1925); unmapped to the south and vacant land to the north (1932); scattered tree line followed by agricultural land and depressions to the south (1939); unmapped to the south and vacant land to the north (1948); drainage ditch and vegetation appears in the center (1952); unmapped to the north and vacant land to the south (1953); scattered tree line followed by depressions to the south (1954); scattered tree line followed by agricultural land and vegetation/depression in the center (1963); unmapped to the south and vacant land to the north (1964); scattered tree line with vegetation in the center and scattered depressions (1972-1973); scattered tree line with vegetation and drainage ditches in the center (1978); addition of scattered depressions (1988-1998); depressions largely no longer present (2006-2009); scattered depressions return (2012-2019); potential wetland mapped in the center (2021).
South	Body of water trending northwest-southeast intersects with body of water trending northeast-southwest (1925); unmapped (1932); agricultural land with depressions (1939); unmapped (1948); agricultural land with depressions (1952); vacant land (1953); agricultural land (1954-1963); unmapped (1964); agricultural land with depressions (1972-1998); depressions largely no longer present (2006-2009); scattered depressions return (2012-2015); potential wetlands mapped (2018-2021).
West	Body of water trending northwest-southeast (1925); unmapped to the south and vacant land to the north (1932); agricultural land with depressions in the center (1939); unmapped to the south and vacant land to the north (1948); agricultural land with scattered depressions and drainage ditches (1952); unmapped to the north and vacant land to the south (1953); agricultural land with scattered depressions and drainage ditches (1954); agricultural land (1963); unmapped to the south and vacant land to the north (1964); agricultural land with scattered depressions and drainage ditches (1972-1978); addition of vegetation in center (1983-1998); depressions largely no longer present (2006-2009); scattered depressions return (2012-2015); potential wetlands mapped to the south (2018-2021).

### 3.2 Historical City Directories

The Polk's City Directory, Haines Criss-Cross Directory, Cole Information, and EDR Digital Archive city directories used in this study were made available through EDR (selected years reviewed: 1959-2020) and were reviewed at approximate five-year intervals, if readily available. Street listings were not available prior to 1959.

### **Historical City Directories**

Direction	Description
Site	40W489 Prairie Street: no city directory listing (1959-2020).
North	No listing; Historically vacant/agricultural land.
East	3405 Prairie Street: no city directory listing (1959-2010); residential listing (2014); no city directory listing (2017-2020).
South	No listing; Historically vacant/agricultural land.
West	No listing; Historically vacant/agricultural land.

Terracon reviewed the above historical city directories for indications of RECs associated with the site. RECs associated with the site were not identified through a review of available historical city directories.

### 3.3 Site Ownership

Based on a review of information obtained from the Kane County assessor's records, the current site owner is Matyas, Thomas E Revoc Trust.

The site owner information reviewed is included in Appendix C.

#### 3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database

report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

#### **Interview**

Interviewer	Name / Phone #	Title	Date/Time
Amy Worley-	Thomas Matyas / (972) 639-8544	Owner	May 22, 2025 /
Peterson		Owner	10:45 AM

Terracon interviewed Mr. Thomas Matyas, site owner, during the site reconnaissance. Mr. Matyas indicated that he has been familiar with the site for approximately 70 years. Mr. Matyas did not know whether biosolids from a wastewater treatment plant had been applied to the fields as fertilizer. Mr. Matyas indicated that the site has been farmland since at least the 1930s. Mr. Matyas indicated that his stepfather farmed the site from approximately 1935 until approximately 2002 and built the on-site ponds around 1990. Mr. Matyas indicated that the site is planted with feed corn and soybeans. Mr. Matyas indicated that there were some old barns and farmhouses from 1880 that were demolished. Irrigation was used in approximately 2001-2002 but has not been used since, according to Mr. Matyas. Mr. Matyas indicated that his parents bought the site in 1955, then Mr. Matyas had jurisdiction since 2005, and has now had full ownership of the site since 2015. Mr. Matyas indicated that he is not aware of any:

- Pending environmental litigation,
- Threatened environmental litigation,
- Past environmental litigation,
- Notices of possible violations of environmental laws,
- Notices of possible liability, or
- Notices of potential environmental concerns.

### 3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

### 4.0 Records Review

Regulatory database information was provided by EDR, a contract information services company in a report dated May 21, 2025. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

#### **Federal Databases**

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1	0

Database	Description	Distance (miles)	Listings
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1	0
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	0
RCRA Non- CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

### **State/Tribal Databases**

Database	Description	Distance (miles)	Listings
Brownfields	Brownfields Databases	0.5	0
IC/EC	Institutional Controls / Engineering Controls	Site	0
LUST	Leaking Underground Storage Tanks	0.5	0
SHWS	State Hazardous Waste Site	0.5	0
SRP	Site Remediation Program	0.5	0
SWF/LF	Solid Waste Facilities / Landfills	0.5	0
UST	Underground Storage Tank Facilities	Site and adjoining properties	0

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

No facilities were identified within the specified search distances. The EDR regulatory database report did not identify any listings for the site or adjoining properties, therefore no

RECs were identified. The site and adjoining properties were not identified with a PFAS ECHO listing in the EDR database report.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed one facility in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, this facility was not identified as the site or adjacent properties. This facility is listed in the database report in Appendix D.

### 4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Illinois Environmental Protection Agency (IEPA) / via online file review at <a href="https://epa.illinois.gov/topics/cleanup-programs/bol-database/leaking-ust.html">https://epa.illinois.gov/topics/cleanup-programs/bol-database/leaking-ust.html</a> and <a href="https://webapps.illinois.gov/EPA/DocumentExplorer/">https://webapps.illinois.gov/EPA/DocumentExplorer/</a> Reviewed online: 6/3/2025	The site was not listed on the aforementioned databases.
Office of the State Fire Marshal (OSFM) / via online file review at <a href="https://webapps.sfm.illinois.gov/USTSearch/">https://webapps.sfm.illinois.gov/USTSearch/</a> Reviewed online: 6/3/2025	The site was not listed on the aforementioned database.
National Pipeline Mapping System (NPMS) / via online Public Viewer at <a href="https://pvnpms.phmsa.dot.gov/PublicViewer/">https://pvnpms.phmsa.dot.gov/PublicViewer/</a> Reviewed online: 6/3/2025	The site was not listed on the aforementioned database.
Sugar Grove Township / via email Request submitted: 5/29/2025	Sugar Grove Township indicated via a phone call on June 2, 2025 that they did not have information responsive to the request.
Sugar Grove Fire Protection District / via email Request submitted: 5/29/2025	According to the Sugar Grove Fire Protection District's FOIA officer, there were no records responsive to the request.
Kane County Health Department / via online request at <a href="https://kanecountyil.nextrequest.com/">https://kanecountyil.nextrequest.com/</a> Request submitted: 5/29/2025	According to Rachael Page, Kane County Health Department FOIA Officer, there were no records responsive to the request.

### 5.0 Site Reconniassance

#### 5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site. At the direction of the client, the interiors of the structures were not viewed. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

### **General Site Information**

Site Reconnaissance				
Field Personnel	Amy K. Worley-Peterson			
Reconnaissance Date	May 22, 2025	May 22, 2025		
Weather Conditions	Partly cloudy / 60s °	F		
Site Contact/Title	Thomas Matyas / Sit	e Owner		
<b>Building Description</b>				
Building	Building	Approx. Construction	Number	Approx.
Identification	Use	Date	of Stories	Size (ft²)
Large barn	Storage	1990	1	4,000
Large barri	Storage	1990	1	4,000
Small barn	Farm residence	1990	1	1,500
Site Utilities				
Drinking Water	Potable well (small barn	only)		
Wastewater	Septic system, not sure if tank or just field			
Electric	Commonwealth Edison (	(ComEd)		

Site Reconnaissance	
Natural Gas	Previous natural gas connection disconnected since approximately 2000

#### **5.2** Areas of Environmental Interest

Due to the large size and rural/forested nature of the site, Terracon reviewed aerial photographs and topographic maps to evaluate areas of environmental interest (AOIs). Areas of environmental interest are defined as, "an area or areas of the property with indications of activity that could have resulted in the presence of a recognized environmental condition, especially areas where hazardous substances or petroleum products may be used, handled, managed or stored or may have been used, handled, managed or stored in the past." The following areas of environmental interest were identified and visited during the site reconnaissance, and are depicted on Exhibit 2:

#### **Areas of Interest**

AOI #	Area of Interest	Description	Location/Parcel ID
1	Present day structures	Where present-day structures are observed from aerials, hazardous substances or petroleum products may be used, handled, managed, or stored.	14-23-300-018
2	Larger/northern pond	Historical farm dumping is a potential REC in heavily vegetated areas within agricultural properties; vegetation near the pond should be observed. Bodies of water are a likely contamination migration pathway; water bodies on-site should be observed.	14-26-300-003

AOI #	Area of Interest	Description	Location/Parcel ID
3	Smaller/southern pond	Historical farm dumping is a potential REC in heavily vegetated areas within agricultural properties; vegetation near the pond should be observed. Bodies of water are a likely contamination migration pathway; water bodies on-site should be observed.	14-26-300-003, 14-26-100-004

### **5.3 Overview of Current Site Occupants**

According to the Kane County Tax Assessor, site observations, and information provided by the Client, the site consists of unincorporated agricultural and residential land in Sugar Grove Township, Illinois. The site consists of mainly row-crop agriculture with some vegetated areas surrounding two on-site ponds, and some drainage tiles, with a residence, farm building, and six grain bins in the northeast portion of the site. An access road extends south through the site from Prairie Street. Please refer to Exhibit 2 in Appendix A for a diagram of the site.

### **5.4 Overview of Current Site Operations**

The site is currently operated by a farmer who has leased the site since 2002. According to Mr. Matya, crops rotate between feed corn and soybeans. The buildings along Prairie Street include a smaller barn/residence, a larger barn, and six empty grain bins.

#### 5.5 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

### **Site Characteristics**

Category	Item or Feature	Observed or Identified
	Emergency generators	
	Elevators	
	Air compressors	
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
Site Operations, Processes, and	Waste treatment systems and/or water treatment systems	
Equipment	Heating and/or cooling systems	X
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	X
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	

Category	Item or Feature	Observed or Identified
	Oil, gas or mineral production	
	Other processes or equipment	X
	Aboveground storage tanks	X
Aboveground Chemical or Waste Storage	Drums, barrels and/or containers $\geq$ 5 gallons	X
J	MSDS or SDS	
	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	X
Underground Chemical or	Grease traps	
Waste Storage, Drainage or	Septic tanks and/or leach fields	X
Collection Systems	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	
Electrical Transformers/	Transformers and/or capacitors	X
PCBs	Other equipment	Χ

Category	Item or Feature	Observed or Identified
	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
Releases or	Trash, debris and/or other waste materials	X
Potential Releases	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	X
	Surface water discoloration, odor, sheen, and/or free floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
	Surface water bodies	X
Other Notable Site Features	Quarries or pits	
	Wastewater lagoons	
	Wells	X

Site Operations, Processes, and Equipment

### Heating and/or cooling systems

The site contact, Mr. Matyas, indicated that the smaller barn/residence has a window air conditioning (A/C) unit.

#### Pesticide/herbicide production or storage

Mr. Matyas indicated that a 1-gallon container of Roundup is stored in the small barn/residence and that no other pesticides are stored on-site (AOI 1). At the direction of the client, interiors of the on-site structures were not viewed.

### Other processes or equipment

Six grain bins were observed in the northeast corner of the site (AOI 1). Many of the grain bins were equipped with electrical panels and electrical fans. According to Mr. Matya, the grain bins are currently empty. Mr. Matya indicated that he was not sure when they were last used but that it was probably prior to 2000. Staining and/or releases were not observed in the vicinity of the grain bins.

An old piece of farming equipment was observed north of the large barn (AOI 1). Staining and/or releases were not observed in the vicinity of the equipment.

A culvert was observed south of Prairie Street, in line with the north-south trending access road through the center of the site (AOI 1). Staining and/or releases were not observed in the vicinity of the culvert.

A natural gas hookup was observed north of the southwestern-most grain bin (AOI 1). According to Mr. Matya, the natural gas has been disconnected since approximately 2000. Staining and/or releases were not observed in the vicinity of the natural gas hookup.

Underground AT&T cables were east of the driveway entrance to the site (AOI 1). Staining and/or releases were not observed within the vicinity of the marker.

A drain tile inlet was observed south of Prairie Street, in line with the north-south trending access road through the center of the site (AOI 1). A drain tile inlet was observed west of the access road and south of the farm structures. A drain tile inlet was observed east of the access road's turn to the west towards the larger retention pond. A drain tile inlet was observed south of the access road's turn to the west toward the larger pond. A drain tile inlet was observed south of the west-trending access road towards the larger pond. A drain tile inlet was observed within vegetation southeast of the northern/larger pond (AOI 2). A drain tile inlet was observed east of the northern/larger pond (AOI 2). Two drain tile inlets were observed north of the smaller/southern pond (AOI 3). A drain tile inlet was observed south of the smaller/southern pond (AOI 3). A drain tile inlet was observed in the vicinity of the drain tile inlets.

A drain tile was observed south of Prairie Street, near the northwest corner of the site. A drain tile was observed east of the access road and south of the farm structures. A drain tile was observed southwest of the access road's turn to the west towards the larger pond. A drain tile was observed south of the west-trending access road. Staining and/or releases were not observed in the vicinity of the drain tiles.

One gazebo was observed northeast of the northern/larger pond (AOI 2).

One outdoor oven was observed southwest of the gazebo (AOI 2). Staining and/or releases were not observed in the vicinity of the outdoor oven.

A drainage pipe was observed southeast of the outdoor oven, directing water to a drainage ditch which appeared to flow from the gazebo to the northern/larger pond (AOI 2). Another drainage pipe appeared to serve the same purpose and was observed further to the south (AOI 2). A drainage pipe was observed north of the northern/larger pond flowing into the pond. A drainage pipe was observed south of the southern/smaller pond (AOI 3). Staining and/or releases were not observed in the vicinity of the drainage pipes.

A grate was observed south of the northern/larger pond (AOI 2). A water intake was observed south of the northern/larger pond (AOI 2). Staining and/or releases were not observed in the vicinity of the grate or water intake.

An outhouse was observed north of the northern/larger pond (AOI 2). Staining and/or releases were not observed in the vicinity of the outhouse.

Aboveground Chemical or Waste Storage

#### **Aboveground storage tanks**

One AST with a dispenser labeled "unleaded" was observed south of the large barn (AOI 1). According to Mr. Matya, the tank is empty to the best of his knowledge. Mr. Matya indicated that the AST was used by his stepfather to store fuel prior to approximately 2000-2002. Mr. Matya indicated that he was not aware of any spills or leaks from the AST. Mr. Matya was unaware of the size or age of the tank. The tank appeared to be empty during the site reconnaissance. The dispenser appeared to be rusted and some minimal rusting was observed on the tank. Staining and/or releases were not observed within the vicinity of the AST.

### Drums, barrels and/or containers ≥ 5 gallons

One approximately 5-gallon container was observed north of the northern/larger pond (AOI 2). The container was not labeled and appeared to be empty. Staining and/or releases were not observed in the vicinity of the container.

Underground Chemical or Waste Storage, Drainage or Collection Systems

#### Sumps, cisterns, French drains, catch basins and/or dry wells

An open-air cistern was observed in the gazebo (AOI 2). Mr. Matya indicated that the water is likely a natural spring. The cistern had standing water but appeared to be routed to drain into the drainage ditch observed south of the gazebo which runs towards the northern/larger pond on-site. Staining and/or releases were not observed in the vicinity of the cistern.

#### Septic tanks and/or leach fields

Mr. Matyas indicated that the septic is located in the grassy area south of the large barn (AOI 1). The entrance to the septic system was observed. Mr. Matya indicated that the well and septic have had very minimal use in the last 15-20 years and that the septic has not been cleaned out in the last 20 years. Mr. Matya was not sure if there was a tank as a part of the septic system. Staining and/or releases were not observed in the vicinity of the septic system.

Electrical Transformers/PCBs

#### Transformers and/or capacitors

One pole-mounted transformer was observed south of Prairie Street in line with the large barn (AOI 1). Staining and/or releases were not observed in the vicinity of the transformer.

### Other equipment

Overhead electrical lines were observed along Prairie Street beginning at the northeast corner of the site, extending to south of Prairie Street in line with the large barn, and ending halfway between Prairie Street and the large barn (AOI 1). Staining and/or releases were not observed in the vicinity of the overhead electrical lines.

An electrical control panel was observed south of the large barn (AOI 1). Staining and/or releases were not observed in the vicinity of the electrical panel.

Releases or Potential Releases

#### Trash, debris and/or other waste materials

Two empty trash cans and metal debris were observed north of the northern/larger pond (AOI 2). Staining and/or releases were not observed in the vicinity of the trash/debris.

One empty trash can and plastic debris was observed north of the gazebo (AOI 2). Staining and/or releases were not observed in the vicinity of the trash/debris.

#### Construction/demolition debris and/or dumped fill dirt

A spare piece of concrete resembling an underwater stormwater vault was observed north of the west-trending access road (AOI 2). Staining and/or releases were not observed in the vicinity of the concrete.

Metal and rubber pipes were observed east of the northern/larger pond (AOI 2). The pipes did not appear to be connected to anything. Staining and/or releases were not observed in the vicinity of the pipes.

Spare lumber was observed north of the northern/larger pond (AOI 2). Staining and/or releases were not observed in the vicinity of the spare lumber.

Other Notable Site Features

#### Surface water bodies

Two ponds were observed on-site (AOI 2 and AOI 3). Mr. Matyas indicated that these ponds were built by his stepfather in approximately 1990 with the intention of using them for irrigation reservoirs. Mr. Matyas indicated that irrigation has not been used on-site since approximately 2001-2002. Staining and/or releases were not observed in the vicinity of the ponds.

#### Wells

One well was observed north of the large barn (AOI 1). Mr. Matyas indicated that the well has not been used much in the past 15-20 years. Mr. Matyas indicated that he was unsure of the depth or age of the well. Staining and/or releases were not observed in the vicinity of the well.

Two well hatches were observed east of the northern/larger pond (AOI 2). Staining and/or releases were not observed in the vicinity of the well hatches.

## **6.0 Adjoining Property Reconnaissance**

Visual observations of adjoining properties (from site boundaries) are summarized below.

### **Adjoining Properties**

Direction	Description
West	Tree line followed by row-crop agriculture and vegetation in the center.
South	Row-crop agriculture.
East	Tree line followed by row-crop agriculture.
North	Prairie Street followed by row-crop agriculture.

RECs were not observed with the adjoining properties.

### 7.0 Additional Services

Per the agreed scope of services specified in the proposal, the following additional services (e.g., Historic Properties/Archaeological Resources Review and Windshield Survey) were conducted.

### 7.1 Historic Properties/Archaeological Resources Review

In Illinois, if a public or private project is receiving federal or state permits, licenses, or funds, the project is subject to review by the Illinois State Historic Preservation Office (SHPO) under federal (Section 106 of the National Historic Preservation Act of 1966, as amended) and/or state (Section 707 of the Illinois State Agency Historic Resources Preservation Act) laws. These laws require the consideration of effects to significant historic and cultural resources, which include prehistoric and historic districts, sites, buildings, structures, and objects that are listed in, or determined eligible for listing in, the National Register of Historic Places (NRHP). A limited historic and cultural resources review was completed to identify previously recorded cultural resources within the site and assess the probability of the area containing significant resources. This review does not fulfill the requirements of Section 106 or Section 707.

A review of the Illinois Inventory of Archaeological Sites (IIAS) and Historic and Architectural Resources Geographic Information System (HARGIS) indicated there are no listed, determined eligible, or previously recorded sites or properties within the site. There are 14 previously identified resources within a one-mile buffer of the site, none of which are listed or determined eligible. Additionally, the Illinois Archaeological Predictive Model (IAPM) was reviewed, and the site is located within a high probability area for encountering archaeological sites.

A review of historic topographic maps and aerial imagery indicated the site primarily has been agricultural land since 1925. Development has included a central driveway, two small structures and two retention ponds near the center of the site, and six grain bins and two farm buildings along the northern boundary of the site (on the south side of Prairie Street). The farm-related buildings appear to have been constructed by 1932 according to historic maps, and the driveway, two small structures, and retention ponds appear to date from between 1983 and 1993 based on aerial imagery. Trees and shrubs were planted to encircle the retention ponds by 2002. The site is largely unchanged since 2002.

It is recommended that if there is a public or private project in the future within the proposed site subject to federal or state laws, additional historic and cultural resources investigations and consultation with the SHPO will be needed. If it is a private undertaking subject only to state law, then archaeological investigations would be needed within the high probability area, which covers nearly all of the proposed site.

### 7.2 Windshield Survey

Terracon performed a windshield survey on May 22, 2025, to observe drainages, culverts, cemeteries, pipeline markers, or potential wetland areas visible from a ROW within the project boundaries. Prior to the site investigation, Terracon reviewed available desktop resources and aerial images from Google Earth Pro to assist in identifying areas of possible drainage crossing or changes in land use. Terracon observed the site from the north-south

trending access road and from Prairie Street. During the field investigation, Terracon identified 1 drainage ditch, 3 drainpipes, 1 culvert, 2 potential water wells, 2 potential wetlands, and electrical power transmission lines. The majority of the study area consisted of agricultural land consisting of corn and/or soybeans. 2 aquatic features (ponds) were observed in the study area, consistent with reviewed background data. Photographs of notable study area features were taken during the windshield survey and are included in appendix.

### 8.0 Declaration

I, Rachelle K. Christian, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Rachelle K. Christian

Berdoll KChuthan

Environmental Department Manager

	ASTM User Questionnaire			
To qualify for one of the <i>Landowner Liability Protections (LLPs)</i> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the " <i>Brownfields Amendments</i> "), the user must respond to the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The <i>user</i> should provide the following information to the <i>environmental professional</i> . Failure to conduct these inquiries could result in a determination that " <i>all appropriate</i> inquiries" is not complete.				
1) Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.25)?  X NoYes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)				
2) Did a search of land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.26)?  X NoYes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)				
3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)?  X_NoYes (If yes, explain below)				
4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)?  X No Yes Not applicable (If yes or Not applicable, explain below)				
5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? For example, (a.) Do you know the past uses of the site? (b.) Do you know of specific chemicals that are present or once were present at the site? (c.) Do you know of spills or other chemical releases that have taken place at the site? (d.) Do you know of any environmental cleanups that have taken place at the site?  X NoYes (If yes, explain below)				
	6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of releases at the site (40 CFR 312.31)?  X_NoYes (If yes, explain below)

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

### **EXECUTIVE SUMMARY**

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

#### **RECORD SOURCES**

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	Target Street	Cross Street	<u>Source</u>

## **GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM**

#### **TARGET PROPERTY ADDRESS**

BLUESTEM SOLAR SOUTH OF PRAIRIE STREET AURORA, IL 60506

#### **TARGET PROPERTY COORDINATES**

Latitude (North): 41.752482 - 41° 45' 8.94" Longitude (West): 88.40683 - 88° 24' 24.59"

Universal Tranverse Mercator: Zone 16 UTM X (Meters): 383034.7 UTM Y (Meters): 4623038.5

Elevation: 714 ft. above sea level

#### **USGS TOPOGRAPHIC MAP**

Target Property Map: 24266907 YORKVILLE, IL

Version Date: 2021

North Map: 24266891 SUGAR GROVE, IL

Version Date: 2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

#### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

Flood Plain Panel at Target Property FEMA Source Type

17089C0318H FEMA FIRM Flood data

Additional Panels in search area: FEMA Source Type

17089C0319H FEMA FIRM Flood data 17089C0385H FEMA FIRM Flood data

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

SUGAR GROVE YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

### **GEOLOGIC AGE IDENTIFICATION**

Era: Paleozoic Category: Stratified Sequence

System: Ordovician

Series: Upper Ordovician (Cincinnatian)

Code: O3 (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Danabrook

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Illinois State Geological Survey

Telephone: 217-333-4747

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

# APPENDIX E CREDENTIALS

# Rachelle K. Christian, P.G.

# Senior Associate Environmental Department Manager

#### PROFESSIONAL EXPERIENCE

Mrs. Christian is an environmental geologist in Terracon's Lubbock, Texas office. She is responsible for managing environmental services in Terracon's Lubbock office including environmental site assessments, subsurface investigations, remedial services, asbestos services and lead-based paint services. She has 30 years of experience in environmental consulting.

Mrs. Christian is responsible for the management and overview of over 500 environmental site assessments per year throughout the U.S., and has participated in more than 3,100 Phase I projects. She has experience with projects ranging from agricultural, residential and commercial properties to industrial manufacturing, EPA Brownfield sites, PST facilities, LPST facilities, RCRA hazardous waste generators, oil and gas field properties, to wind and solar properties.

Mrs. Christian has experience in client interaction and marketing with numerous clients including private landowners, developers, local municipalities, major retail chains and large scale lending institutions. She is proficient in the coordination of site activities with local, state and federal regulatory agencies.

#### PROJECT EXPERIENCE

#### **TRANSPORTATION**

#### High-Five TXDOT Development - Dallas, Texas

Project Manager for the High-Five TXDOT ESA at the intersection of I.H. 635 and U.S. 75 in Dallas, Texas.

**Professional Services Completed:** 2000 **Construction Completed:** May 2005

#### **DFW Connector Development - Grapevine, Texas**

Project Manager and overview for the DFW Connector 56 ESAs at the interchange of S.H. 114 and S.H. 121 in Grapevine, Texas.

**Professional Services Completed:** 2010 **Construction Completed:** March 2014

# COMMERCIAL/RETAIL/FINANCIAL/TELECOMMUNICATIONS

#### **ESA Portfolios**

Project Manager for numerous ESAs conducted in conjunction with the acquisition of numerous convenience store/gasoline service stations, vehicle/equipment dealerships, light industrial office/warehouses, industrial manufacturing facilities, newspaper/printing facilities, apartment complexes, medical office buildings, agricultural facilities, vacant land, and telecommunication tower sites, etc. in Texas and the U.S.

**Professional Services Completed:** 1996-2025

#### **EDUCATION**

Bachelor of Science, Geology, 1995, University of Texas at Arlington

#### REGISTRATIONS/ CERTIFICATIONS

Professional Geoscientist: Texas, No. 222

TDSHS Licensed Asbestos Inspector (License No. 60-1732)

TDSHS Licensed Lead Risk Assessor (License No. 2070466)

TDLR Licensed Mold Assessment Technician (License No. MAT1059)

#### **PROFESSIONAL TRAINING**

40-Hour OSHA Hazardous Waste Operations Training

8-Hour OSHA Hazardous Waste Operations Training (HAZWOPER)

University of Houston/TCEQ Texas Risk Reduction Program (TRRP) Modules 1 and 2

PEC Safeland USA Training Course

**H2S Safety Awareness** 

CPR and First Aid

8-Hour NORM Surveyor Training

# Rachelle K. Christian, P.G. (continued)

#### Ranch and Large-Scale Properties - Texas and New Mexico

Project Manager and overview of ESAs on multiple ranch and large-scale properties ranging in size from 1,000 acres to 170,000 acres.

**Professional Services Completed: 2009-2025** 

#### **PUBLIC ENTITIES**

#### **Brownfields Redevelopment**

Project Manager for numerous downtown Dallas and Fort Worth ESAs, including sites for the American Airlines Center (AAC), as well as in Greenville and Arlington, Texas, for West Central Texas Council of Governments (WCTCOG), and for West Texas/Panhandle and Eastern New Mexico cities.

**Professional Services Completed:** 1999-2022

#### **Utilities**

Project Manager for proposed utility corridors for both water and sewer line ESAs.

**Professional Services Completed: 2012-2015** 

#### **ENERGY**

#### Oil & Gas Due Diligence - Texas and New Mexico

Assisted in multiple Phase I ESAs on over 1,500 oil and gas well production locations, injection and disposal wells, tank batteries, compressor stations, gas plants, field offices, pipe yards in Southwest Texas, West Texas and New Mexico. Duties included field reconnaissance, regulatory records and historical review, and reporting. The projects included reviews of available RRC regulatory documentation, Notices of Violations, Air permits, and Spill Prevention, Control and Countermeasure (SPCC) plans associated with each of the sites. Additionally, Mrs. Christian has aided in the management of project managers conducting due diligence of oil and gas properties.

**Professional Services Completed:** 2009-2025

#### **Wind and Solar Power**

Project Manager and overview for ESAs on proposed wind and solar power properties in Texas. Duties included field reconnaissance of acreage, associated oil/gas fields, historical review and reporting.

**Professional Services Completed: 2009-2025** 

#### **Power Plants**

Manager Overview for several ESAs on mothballed power plants in West Texas and Project Manager for several active power plants in Texas, New York and Massachusetts.

**Professional Services Completed: 2007-2023** 

# Amy Worley-Peterson

Field Scientist - Environmental

#### PROFESSIONAL EXPERIENCE

Ms. Worley-Peterson is an field scientist in Terracon Consultants Inc.'s (Terracon) Glendale Heights, Illinois office. Ms. Worley-Peterson assists with Phase I Environmental Site Assessments (ESAs). These responsibilities include project registration, site visits, record reviews, contacting local agencies, report preparation, and client communication. Ms. Worley-Peterson came to Terracon in June of 2023 after completing her B.S. in Natural Resources and Environmental Science at Purdue University in December of 2022. Before completing her degree, Ms. Worley-Peterson had varied experiences in the natural resources and environmental industry including participation in two different research labs; the St Marys Watershed Initiative where she assisted in data collection in processing soil samples and the Purdue Hydrologic Impacts Group where she assisted in data collection in evaluating watersheds using geographic information systems (GIS).

#### PROJECT EXPERIENCE

#### Phase I ESA - Chicago, Illinois

Evaluated records, site photos, and site visit notes to write Phase I ESA report. Ordered EDR reports and made FOIA requests to collect records for review. Used online databases such as Web Soil Survey and USGS Mineral Resources Online Spatial Data to evaluate soil and geology of the site. Summarized historical knowledge of the site using the EDR regulatory database report, historical topographic maps sourced from a past Terracon report in the same area, EDR-provided historical aerial photographs, Sanborn maps, and HIG-provided City Directories. Utilized the Cook County's assessor's records to determine current ownership of the site. Evaluated nearby on-site UST listings, nearby UST and LUST listings, nearby historical cleaner listings, and nearby institutional controls and engineering controls and site remediation plan listings for possible impacts to the site.

#### Education

Bachelor of Science, Natural Resources and Environmental Science, Purdue University, 2022

#### **Training**

OSHA 40-Hour HAZWOPER

#### Work History

Terracon Consultants, Inc., Environmental, 2023 to present

Purdue University Archives and Special Collections, Undergraduate Student Assistant, 2022

Environmental Voter Project, Voter Mobilization & Research Intern, 2022

Shedd Aquarium and Illinois-Indiana Sea Grant, Community Engaged Intern, 2022

#### Community Involvement Plan - Will County, Illinois

Assisted writing the community involvement plan (CIP) for a Brownfields assessment grant project in Will County. Used information from the client's work plan to fill out a Terracon CIP document structure.

#### Phase I ESA - Elgin, Illinois

Conducted a Phase I ESA on a 0.44-acre vegetated site to be used for expansion of the adjoining business. Conducted site reconnaissance and took site photos. Ordered EDR reports and made FOIA requests for records to review. Evaluated records, site photos, and site visit notes to write Phase I ESA report. Communicated with client on needed documents and for scheduling of site visit.

#### **Phase I ESA - Earlville, Illinois**

Conducted a Phase I ESA on a 246-acre site covered with row crops and two barn structures. Conducted site reconnaissance and took site photos of the large site and entered both buildings for observations. Ordered EDR reports and made FOIA requests for records to review. Evaluated records, site photos, and site visit notes to write Phase I ESA report. Communicated with client on needed documents and for scheduling of site visit.

#### Phase I ESA - St Charles, Illinois

Assisted taking site photos: cover photo, exterior photos, photos of adjoining properties, photos of the interior, photos of site features to be noted in the report. Creation of the photo log with detailed description of photos to assist in reading Phase I ESA report and understanding where things are oriented.

#### Phase I ESA - Hoffman Estates, Illinois

Conducted site reconnaissance and took photos of the site, adjoining properties, including views of addresses, and features off-site. Evaluated gradient of site to evaluate vapor migration. Ordered EDR reports and made FOIA requests to collect records for review. Evaluated records, site photos, and site visit notes to write Phase I ESA report. Communicated with client on needed documents.

#### **Phase I ESA – Sandwich, Illinois**

Conducted a Phase I ESA on a parcel to be used for a different purpose than the larger property it exists on. Conducted site reconnaissance and took site photos. Ordered EDR reports and made FOIA requests for records to review. Evaluated records, site photos, and site visit notes to write Phase I ESA report. Communicated with client on needed documents.

#### Phase I ESA - Seneca, Illinois

Conducted a Phase I ESA on a parcel to be used for a different purpose than the larger property it exists on. Conducted site reconnaissance and took site photos. Ordered EDR reports and made FOIA requests for records to review. Evaluated records, site photos, and site visit notes to write Phase I ESA report. Communicated with client on needed documents.
