Consultant

Luay R. Aboona, PE, PTOE
Principal

DATE: September 17, 2026

SUBJECT: Traffic Impact Evaluation
Proposed Recovery Assisted Living Facility
Kane County, Illinois

This memorandum summarizes the results of a traffic impact evaluation conducted by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA, Inc.) in connection with the proposed Recovery Assisted Living Facility to be located at 35W 543 Miller Road in unincorporated Kane County, Illinois. The site is currently a single-family residence that will be converted into an assisted living recovery facility providing clinically-managed residential treatment for 30 individuals living on-site recovering from substance use disorder.

As proposed, the converted facility serving 30 individuals living on-site will be staffed with 24-hour supervision and will utilize the existing residential building. Access to the facility will continue to be provided via the two existing access drives serving the driveway off the south side of Miller Road.

Site Location

The site is located at 35W 543 Miller Road, on the south side of the roadway, opposite Parsons Road. Two driveway access points serve the site on the south side of Miller Road, east and west of Parsons Road. The site is bordered by other residential properties on all sides. Area surrounding land uses are primarily residential and agricultural. **Figure 1** shows an aerial view of the site.

Aerial View of Site

Figure 1

Existing Roadway Characteristics

The characteristics of the existing roadways that surround the proposed facility are described below.

Miller Road is an east-west major collector roadway that provides one lane in each direction, extending west from IL 31. At its intersections with IL 31, Parsons Road, and Oak Knoll Road, Miller Road does not provide exclusive turn lanes. At its intersection with IL 31, Miller Road provides a combined left-turn/right-turn lane on the eastbound approach that is under stop sign control. Miller Road is under the jurisdiction of Dundee Township, carries an annual average daily traffic (AADT) volume of 4,600 vehicles (Illinois Department of Transportation [IDOT] 2023), and has a posted speed limit of 35 miles per hour.

IL 31 is a north-south minor arterial roadway that provides one lane in each direction in the vicinity of the site. At its unsignalized intersection with Miller Road, IL 31 provides a left-turn lane on the northbound approach. IL 31 is under the jurisdiction of IDOT and has a posted speed limit of 50 miles per hour. IL 31 carries an AADT volume of 19,500 vehicles (IDOT 2025) south of Miller Road and 21,500 vehicles (IDOT 2025) north of Miller Road.

Parsons Road is a north-south local road that extends north from Miller Road and provides one lane in each direction. At its unsignalized intersection with Miller Road, Parsons Road provides a combined left-turn/right-turn lane on the southbound approach that is under stop sign control. Parsons Road is under the jurisdiction of Dundee Township and has a posted speed limit of 30 miles per hour.

Oak Knoll Road is a north-south local road that extends south from Miller Road and provides one lane in each direction. At its unsignalized intersection with Miller Road, Oak Knoll Road provides a combined left-turn/right-turn lane on the northbound approach that is under stop sign control. A standard-style crosswalk is provided on the south leg of the intersection. Oak Knoll Road is under the jurisdiction of the Village of Carpentersville and has a posted speed limit of 25 miles per hour.

Existing Traffic Volumes

To determine the current traffic conditions within the study area, 24-hour traffic counts were conducted on Thursday, July 9, 2026, and on Saturday, July 11, 2026, at the intersection of Miller Road with Parsons Road, opposite the site.

The results of the traffic counts show that over the 24-hour period, there were approximately 4,148 vehicles that passed through the intersection on Thursday and approximately 2,640 vehicles on Saturday.

A copy of the traffic count summary sheets is included in the Appendix.

Sight Distance Study

Sight distance exhibits were prepared for both driveway access points. The posted speed limit is 35 and therefore the design speed limit is 40 miles per hour. As such, the required stopping sight distance (SSD) is 305 feet and the required intersection sight distance (ISD) is 445 feet. Copies of the sight distance exhibits are included in the Appendix.

As can be seen in the exhibits, the westerly driveway access point is not obstructed by any hard structures or roadway elevations. Therefore, this driveway access point meets the required SSD and ISD distances and as such can accommodate outbound traffic in both directions.

From the exhibits, it can be seen that the easterly driveway access point has an area of conflict west of the driveway. Additionally, included in the exhibits is a diagram illustrating that the SSD for westbound inbound left-turn movements at the easterly driveway access point will be met. As such, inbound traffic from both directions on Miller Road will be allowed at this access point.

The driveway access point does not meet the required SSD and ISD distances for outbound traffic from the site. As such, outbound movements from the driveway should be restricted and the driveway be converted to allow inbound movements only. A “Do Not Enter” sign should be posted internally near the facility preceding the entrance to the easterly driveway.

Proposed Site Plan and Facility Operations

As proposed, the existing single-family house on the site totaling approximately 9,275 square feet will be converted into an assisted living recovery facility providing clinically-managed residential treatment for individuals living on-site recovering from substance use disorder.

The facility will provide structured and supervised living for up to 30 adults. Residents will have 24-hour staff supervision and will not have personal vehicles and will primarily remain on the property. Residents will be transported via facility vehicles to off-site meetings, appointments, or employment. There will be four staff members on-site per shift, with three shifts per day. There will be conservatively three food service deliveries per day, one delivery per meal. There will be an estimated two shuttle trips per day to transport residents. While not occurring every day, occasionally speakers or other guests will be on-site for additional programming.

Staff on-site during each shift will park on the driveway, adjacent to the facility.

Access to the facility will continue to be provided via the existing driveway system:

- The westerly driveway access located approximately 85 feet west of Parsons Road. This driveway extends south from Miller Road and is approximately 12-feet-wide. This driveway allows for two-way traffic and loops south and then east to the main house and garages on the site.

- The easterly driveway access located approximately 125 feet east of Parsons Road. This driveway extends south from Miller Road and is approximately 20-feet-wide. This driveway extends south to the main house and garages on the site.
 - Based on the preceding sight distance study, this driveway will be converted to allow for one-way, inbound traffic only. A “Do Not Enter” sign should be posted internally near the facility preceding the entrance to the easterly driveway.

Trip Generation Estimates

The total number of vehicle trips to be generated by the proposed facility was estimated utilizing the data provided by the operator about the staff and other vehicle trips that will arrive and depart from the site. The daily two-way trips are outlined in **Table 1**. In addition to the trips that will be generated daily by the staff, food service delivery, and resident shuttle vans, to provide a conservative estimate, it was assumed that an outside guest speaker was on-site. As can be seen in the table, the total number of estimated trips generated is to be 36 total trips per day.

Table 1
SITE-GENERATED TRIPS – BASED ON OPERATIONS

	Two-Way Daily Trips		
	In	Out	Total
Staff	12	12	24
Food Service	3	3	6
Shuttle Vans	2	2	4
Guest Speakers	1	1	2
Total	18	18	36

Traffic and Access Evaluation

When the traffic estimated to be generated by the proposed facility is compared to the traffic on the adjacent roadway system, the proposed recovery facility will not have a significant impact due to the following:

- The total volume of traffic that will be generated by the proposed facility will be relatively minimal.
- Residents of the facility will not have access to personal vehicles and will be transported as needed by facility vans.
- The facility traffic will be distributed to the site from the area roadways via two driveway access points off Miller Road.

- Based on the existing traffic volumes on Miller Road, the trips estimated to be generated by the facility are projected to increase the traffic traversing Miller Road by one percent or less.

As such, the existing roadway system and the site access system will be able to accommodate the traffic estimated to be generated by the proposed facility with minimal delays or impacts.

Conclusion

Based on the proposed development plan and the preceding evaluation, the following conclusions and recommendations are made:

- The existing single-family residence occupying the site will be converted into an assisted living recovery facility providing clinically-managed residential treatment for 30 individuals living on-site recovering from substance use disorder.
 - Residents of the facility will not have access to personal vehicles and will be transported as needed by facility vans.
- The facility traffic will be distributed to the site from the area roadways via two existing driveway access points off Miller Road.
- Based on the existing traffic volumes on Miller Road, the trips estimated to be generated by the facility are projected to increase the traffic traversing Miller Road by approximately one percent or less.
- The existing roadway system and the site access system will be able to accommodate the traffic estimated to be generated by the proposed facility, with minimal delays or impacts.
- To meet sight distance requirements, the easterly driveway access point should be restricted to inbound movements only and a “Do Not Enter” sign should be posted internally near the facility preceding the entrance to the easterly driveway
