

Land Surveying Instrument Person

Compass Surveying Ltd., an industry leader dedicated to delivering high-quality services with precision and professionalism is seeking a motivated and detail-oriented **Full Time, Instrument Person** to join our team. The ideal candidate will assist in conducting land surveys, collecting field data, and supporting our crew chiefs and licensed land surveyors in delivering precise and reliable results.

Key Responsibilities:

- Operate and maintain survey instruments including total stations, data collectors, GPS and levels (Trimble experience a plus)
- Assist with field surveys using data collection and layout for boundary, topographic, construction staking, and as-built surveys
- Collect accurate field data and keep detailed field notes
- Communicate effectively with team members and project supervisors
- Be comfortable with physical work and working outdoors in varying weather conditions
- Have the ability to carry survey equipment (up to 25 lbs.) across paved areas and plowed fields
- Be able to use hand tools and be able to pound stakes in the ground, dig holes, and clear vegetation
- Follow all company safety protocols and procedures

Qualifications:

- High school diploma (Associate's degree in surveying or related field preferred)
- Minimum of 2 years of land survey fieldwork experience
- Experience with robotic total stations, data collectors and GPS systems
- Ability to work well in a team and follow instructions
- Valid driver's license (required) and clean driving record
- Be available for occasional overtime work and overnight travel

What We Offer:

- Opportunities for training and career advancement
- \$24.00-\$26.00/hr.
- Health, dental, and vision insurance
- Simple IRA plan with company match
- Supportive team environment
- Paid time off and holidays
